

# RAPID - Resource Allocation and Planning Integrated

SISCOG - Sistemas Cognitivos, S.A.

Lisboa - Concelho de Lisboa - Distrito de Lisboa

## Priority

The RAPID project focuses on introducing innovative techniques and components into SISCOG's products.

Founded in 1986 as an Artificial Intelligence company, SISCOG competes in the international market alongside large corporations operating in its niche sector. The company's success, and its survival, hinges on the innovation it brings to its products, keeping it ahead of the competition.

The developments proposed in this project are aligned with SISCOG's 2024–26 strategic plan. The requested funding represents an opportunity for the Portuguese Government to support a company that has been active in international markets since 1993, with around 90% of its revenue stemming from exports to Northern European and American countries. It also provides a means to foster advancements in the strategic field of Artificial Intelligence.

**Total investment**

760.759,29 €

**European Union  
financial support**

304.303,72 €
